## About FT8 Users Group

The FT8 Users Group is an exclusive and diverse group of legacy P&W equipment owners that own/operate the base fleet of FT8 gas turbines. The FT8 Users Group collectively networks, shares information, and cooperate amongst each other to identify and address solutions to common issues, concerns, and shortfalls associated with legacy P&W equipment.

Our three day conference is intended to deliver end-user collaboration, technical information, training, and professional development across our extensive user base.

The FT8 Users Group is unlike the majority of typical industry conferences. Solution Providers/Vendors are allowed to attend all sessions throughout the conference with the exception of the end-user only session.
